Profile

Dynamic and skilled web developer proficient in HTML, CSS, and JavaScript, including Sass for efficient styling. Extensive experience in modern frameworks such as React and Redux, with the ability to utilize React Router for seamless navigation within applications. Demonstrated expertise in crafting responsive and visually appealing web applications using Bootstrap and Tailwind CSS. Strong understanding of version control systems like Git and collaborative platforms such as GitHub. Currently expanding expertise with Next.js to further enhance web development capabilities. Excels in translating client requirements into efficient and elegant solutions, contributing to seamless user experiences and enhanced functionality. Proven track record of delivering high-quality projects within deadlines. Committed to staying updated with industry trends and technologies to continuously improve development skills

Skills

Projects

Social Media App

It's a social media app similar to Instagram. You can create, edit, and remove posts as well as have a profile with an auth system using the Appwrite platform for the backend and React with Context API for auth as well as the Strong Shadcn UI library. Take a look..

Fullstack Ecommerce

A fullstack ecommerce app built using Next.js and MongoDB database with a dashboard to add, edit, or remove products, users, categories, and an auth system using JWT and Next.js middleware with a full search and filtering functionality and a cart system with a real payment using Stripe and a lot more. I highly recommend visiting this website and discovering it. You can sign in with these details to see the dashboard: Email: Admin@gmail.com Password: Admin123 (All in small case)
