- zustand

## Projects

### **Fullstack Ecommerce** [🔗](#)

A Fullstack Ecommerce App Build Using Nextjs And Mongodb Database With A Dashboard To Add Edit Or Remove Products, Users, Categories, And An Auth System Using Jwt And Nextjs Middleware With A Full Search And Filtering Functionality And A Cart System With A Real Payment Using Stripe And Alot More I Highly Recommened Visit This Website And Discover It You Can Sign In With These To See The Dashboard Email: Admin@Gmail.Com Password: Admin123 (All In Small Case)

### **Social Media App** [🔗](#)

I'ts A Social Media App Similer To Instagram You Can Create Edit And Remove Posts As Well As You Can Have A Profile With Auth System Using Appwrite Platform For The Backend And React With Context Api For Auth As Well As The Strong Shadcn Ui Library Take A Look..

### **YouTube Clone With Youtube Api V3** [🔗](#)

A Simple Youtube Clone With A Responcive Design Using Tailwindcss And React As Well As Redux Toolkit You Can Watch Search And See The Recommanded Videos For That Video You Are Watching

### **GYM Exercises App With Rapid Api** [🔗](#)

Browes Alot Of Exercises And Pick The One You Liked And Go To It's Page To Show The Full Guide And A Youtube Videos To Learn You How To Do It, I Build This Project Using React And Sass For The Styling As Well As Rapid Api
