Projects

Fullstack Ecommerce ↗
A Fullstack Ecommerce App Build Using Nextjs And Mongodb Database With A Dashboard To Add Edit Or Remove Products, Users, Categories, And An Auth System Using Jwt And Nextjs Middleware With A Full Search And Filtering Functinality And A Cart System With A Real Payment Using Stripe And Alot More I Highly Recommened Visit This Website And Discover It You Can Sign In With These To See The Dashboard Email: Admin@Gmail.Com Password: Admin123 (All In Small Case)

Social Media App ↗
I'ts A Social Media App Similer To Instagram You Can Create Edit And Remove Posts As Well As You Can Have A Profile With Auth System Using Appwrite Platform For The Backend And React With Context Api For Auth As Well As The Strong Shadcn Ui Library Take A Look..

YouTube Clone With Youtube Api V3 ↗
A Simple Youtube Clone With A Responcive Disign Using Tailwindcss And React As Well As Redux Toolkit You Can Watch Search And See The Recommanded Videos For That Video You Are Watching

GYM Exercises App With Rapid Api ↗
Browes Alot Of Exercises And Pick The One You Liked And Go To It's Page To Show The Full Guide And A Youtube Videos To Learn You How To Do It, I Build This Project Using React And Sass For The Styling As Well As Rapid Api
